MEASUREMENT & CONTROL SYSTEMS

# Engineering and Consulting

# We solve brainteasers!

Our history begins in 1976 with the production and the distribution of electro-mechanical water dosing machines. The development of our own online sand testing laboratories and the first fully networked measurement and control system in the 1990s makes us finally to a driving force of new technologies.

We believe that to stand still is to fall behind. We have made it our task to continuously develop new technologies and individual solutions for our customers.

Cooperations with German universities in basic research and the development of new technologies help us solve the questions of our customers. Benefit from over 40 years of specialized know-how and turn your headache into our challenge. We also develop individual concepts and solutions for your company. Ordinary is something we leave to others.

# Our know-how

## Independent. Competent.

### **Analysis competence**

For questions surrounding your sand plant

### **Engineering**

Individual solutions for your company

### **Industry leader**

The knowledge of over 40 years at your disposal

### **Manufacturer-independent**

consulting for your aggregates

### **Investments**

Avoid unprofitable investment

### **Discover**

potentials to achieve goals

### **Identify**

and resolve weak points

# Advice instead of guesswork Specialized.

We advise our customers on questions concerning their systems. Where are vulnerabilities? Is there potential for optimization? What steps can be taken to make existing old systems fit for the next millennium?

Get our expertise for your investments. Over 40 years of experience and thousands of systems in different countries, plants and cultures have made us specialists. Whether new planning, retrofitting or optimization, before you decide, ask us!

We work for you, independently of manufacturers, to find optimal solutions and to avoid expensive investments. Benefit from our unique industry knowledge and secure an independent voice for your decision.

# Please contact us

At the time when change is becoming an everyday occurrence, the demands and requirements to technology are growing. Therefore, with more than 40 years of expertise, scalable technology, and well-trained technicians, we can assist you in the support of your systems.
